Frontend & Mobile Developer | Full-Stack Engineer | AI-Powered App Development

SUMMARY

A Computer Science graduate with hands-on experience building web apps, mobile apps, and AI-powered features from scratch. Comfortable working with tools like Java, React, Next.js, Flutter, and Laravel, and has completed several real projects from start to finish, including a full event planning platform and an online store for a small local business. Previously worked as a Frontend Development Intern at Vast.lb, and ready to bring strong coding skills and a fast-learning mindset to an entry-level engineering role.

CORE COMPETENCIES

Frontend Development, Mobile Development, Database Design, Application Architecture, User Interface, Prompt Engineering, Version Control, Team Collaboration, Requirements Analysis.

EDUCATION

Bachelor's degree in Computer Science | Al Maaref University – *Beirut, Lebanon* **July 2026**

PROFESSIONAL EXPERIENCE

Frontend Development Intern | Vast.lb **January 2026 – June 2026**

- Built and delivered multiple frontend projects, including portfolio websites, and landing pages, using HTML, Tailwind CSS, and JavaScript to meet client design requirements.
- Developed approximately 3 full-scale React web applications alongside several smaller projects, addressing real-world user interface and experience requirements for diverse client needs.
- Applied prompt engineering techniques to accelerate development workflows, streamline debugging, and generate boilerplate and component code more efficiently across ongoing frontend projects.
- Collaborated using Git and GitHub for version control, including branching strategies, pull requests, and resolving merge conflicts within a structured team workflow.

PROJECTS

MK7 Services — Full-Stack E-Commerce & Business Platform **September 2026 – October 2026**

- Built a full-stack e-commerce platform for a local retail business with guest, customer, and admin roles, featuring a dynamic product catalog, admin-managed categories and photo uploads, a complete checkout flow with card and cash/WhatsApp payment options, and an admin dashboard with sales analytics and order management.

- **Technologies Used:** TypeScript, Next.js, Prisma, PostgreSQL, NextAuth, Tailwind CSS, Stripe API.

Event Planning Platform — Website and Mobile App (FYP) **December 2025 – July 2026**

- Built a cross-platform event planning solution with 3 user roles, real-time messaging, AI-powered budget generation, vendor coordination, task assignment, analytics, and calendar scheduling, integrating a Laravel REST API seamlessly across both web and mobile platforms.
- **Technologies Used:** Flutter, Laravel, REST APIs, Dart, PHP.

Sales Web Application **May 2026 – June 2026**

- Developed a full-stack e-commerce web application supporting guest and authenticated customer roles, featuring a responsive landing page, category browsing, add-to-cart functionality, and secure order placement with robust authentication, session management, and streamlined checkout flow.
- **Technologies Used:** PHP, Laravel, MySQL.

SKILLS

Web & Mobile Development: HTML, CSS, JavaScript, SQL, React, Tailwind CSS, Laravel, Flutter, TypeScript, Next.js.
Programming Languages: Java, C++, Python, PHP, Dart.
Tools & Platforms: Git, GitHub, VS Code, MySQL Workbench, Vercel, Railway, Stripe API.
Databases & Backend: PostgreSQL, MySQL, Prisma ORM, REST APIs, NextAuth (authentication).
Concepts & Methodologies: OOP, Data Structures and Algorithms, Agile Methodology, REST APIs.
AI & Machine Learning: Generative AI, Retrieval-Augmented Generation.
Soft Skills: Teamwork, Communication, Adaptability, Problem Solving, Attention to Detail, Fast Learner, Critical Thinking, Time Management, Collaboration, Patience, Curiosity, Self-Motivation.

LANGUAGES

Arabic (native), **English** (full professional proficiency).
